The new Finch West subway station is progressing well with large portions of the station structure complete. Since the temporary local closure of Keele Street began on July 7, 2014, significant construction work has been underway to remove traffic bridges, install utility connections and backfill over the station structures.

**KEELE STREET CLOSURE – SOUTH OF FINCH AVENUE WEST – CLOSURE EXTENDED**

Keele Street southbound, for a 100 m section south of Finch Avenue West, is currently closed and scheduled to reopen on August 22, 2014. The extended closure in this area is required to continue to complete the necessary project work on multiple utility connections, which are more complex than originally anticipated.

**KEELE STREET CLOSURE – NORTH OF FINCH AVENUE WEST**

One block of Keele Street, between Finch Avenue West and Four Winds Drive is currently closed to all traffic and scheduled to reopen as previously announced on August 31, 2014. Project work continues to progress on schedule.

Finch Avenue West will remain open during this period. Access to local businesses will be maintained on Finch Avenue West.

**Detour Route Open Throughout Closure**

The detour route via Murray Ross Parkway/Tangiers Road/Toro Road will be open throughout this period for traffic to bypass the closure area. Detour signs will be posted to redirect through traffic to alternate routes. Motorists can expect to experience traffic delays. The map on the back shows the detour route in either direction.

**Note** that trucks are not permitted on Keele Street south of Murray Ross Parkway or on Broadoaks Drive or Catford Road. Advance signage will be provided.

Motorists are asked to please obey all signs.

**TTC Bus Routes**

Transit delays may be experienced on 36 Finch West, 107 Keele North and 41 Keele. Northbound and southbound bus routes that normally travel on Keele Street will use the detour route. New bus stop locations are shown on the map.

**Pedestrian Access/Walkways**

There may be periodic closures of pedestrian pathways, and alternate routes will be provided. Pedestrians should follow the posted signage and take extra care when walking near or through construction areas.

**Construction Work Hours**

The City of Toronto has approved a noise by-law amendment for major transit projects which allows contractors to work extended hours and on weekends for the duration of the project, when required. Extended work hours are expected to be in effect in the Keele/Finch area this summer.

Finch West Station construction work is permitted under the noise by-law from 7:00 a.m. to 11:00 p.m., seven days per week. The contractor also has an exemption to the noise by-law for major civil works outside of these hours until May 1, 2015. Construction Notices will be sent out before extended work hours begin to keep residents and businesses informed.
TTC Bus Routes Affected

Transit delays can be expected on buses during peak times

• 36 Finch West
• 107 Keele North (detour)
• 41 Keele (detour)

Bus stops will be temporarily relocated for construction. Watch for posted notices.
